

PRESS RELEASE - 27th JUNE 2005

### **Vxl acquires rights to manufacture Morven power supplies**

Power supply manufacturer Vxl Power has acquired the intellectual-property rights of Morven Electronics' complete range of products, which include battery chargers, DC/DC converters, DC/AC inverters, and switch-mode and linear PSUs.

Morven has been manufacturing these products in Glasgow since 1992, but the business is closing as part of the retirement plans of founders Peter and Janice Newland, and production of the entire range has now been transferred to Vxl's 9500ft<sup>2</sup> factory in Lincoln.

Under the terms of the agreement, Peter Newland will be retained as a consultant, helping Vxl with the design and development of new products for Morven's traditional markets in the marine, automotive, professional audio and telecommunications industries.

In addition, Morven sales manager Paul Brooks and other key staff will be working with Vxl to ensure that customers continue to receive ongoing support.

Commenting on the move, Vxl's technical director, Grant Ashley, said: "This is an important development for Vxl as it gives us a much broader range of standard products, increases our customer base and further strengthens our position in the battery-management sector of the market."

Vxl has enjoyed steady organic growth since it was set up in 2003 by former employees of Bulgin Power Source to design and manufacture intelligent battery-backed power supplies and custom PSUs, and the Morven range forms an ideal complement to Vxl's existing product portfolio.

Orders for Morven products can now be placed directly with Vxl on 01522 500511.
